

PERSONALIZED SERVICE

Access to a team of economists

Ask an economist

For customers who value the personal contact and bespoke advice, we can provide access to our economists in a variety of formats.

Any customer can call us to ask for more information regarding the results of our tools, on specific events affecting emerging markets and mature economies monitored by TAC ECONOMICS. We will always try to answer as quickly as time and resource allow. The answers to these requests will be made through emails, conference calls or “ad hoc” notes.

Many of our customers choose to add a specific hotline and/or meetings at their office to their annual subscription to secure exchange of views with the team of economists on a regular basis.

Some issues recently addressed

- Country risk analysis on Brazil and impact on economic outlook depending on poll results
- Trade war consequences on our global macro scenario
- October market reversal: Short term turbulences or durable sell-off
- Q&A on the Italian situation: Eurozone forecasts, Sovereign Spreads Impact
